

Capabilities Statement

Minburn is a Value-Added Reseller focused on providing enterprise Information Technology solutions. Founded in 2010, Minburn has been verified by the U.S. Department of Veterans Affairs (“VA”), Center for Veterans Enterprise (“CVE”) as a Service-Disabled Veteran-Owned Small Business (“SDVOSB”) concern.

Top 100 Largest Government Contractors

At Minburn, we believe that focus is the key to long-term customer satisfaction. Our guiding philosophy is to do a few things exceptionally well rather than many things poorly. As a result, our company is focused on the following four core competencies:

Core Competencies

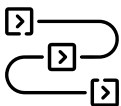

Microsoft Enterprise Software and Cloud Computing Solutions

Our principal core competency is supporting Microsoft Enterprise Agreements and delivering complex Azure cloud computing solutions to US government end customers and SIs. Minburn currently supports over 300 active Microsoft Enterprise and Server and Cloud Enrollments. Minburn has unique knowledge of Microsoft contracting practices and government license terms necessary to provide optimal support to US government customers.

Federal Healthcare

Our dedicated Federal Healthcare team has a proven track-record of successfully delivering large and complex IT and medical equipment, hardware and niche and specialty software solutions at US Department of Veterans Affairs (VA) facilities, as well as the Defense Health Agency and other US government agencies whose mission involves healthcare services.

Consolidated Hardware and Software Procurement Support

Minburn acts as a single POC for multi-vendor, enterprise-class hardware and software solutions, leveraging strategic alliances with key technology vendors such as Microsoft, NetApp, Cisco, Dell and HPE. Government SIs often qualify for Small Business and SDVOSB credit under their Small Business Subcontracting Plans by sourcing through Minburn.

DoD and Intelligence Community (IC) Support

Minburn specializes in helping DoD and IC agencies acquire a broad range of IT hardware, software and solutions, while meeting the unique needs and requirements of these agencies. Minburn employees have decades of experience supporting customers operating in restricted environments. We leverage our broad range of partnerships with enterprise IT manufacturers – including Microsoft, HPE, Dell, NetApp and Cisco – and pre-approved and flexible contracting vehicles such as SEWP V and the GSA Schedule, to help DoD and IC agencies acquire the competitively-priced IT products and solutions quickly and simply.
